EDUCATION

Indian Institute of Information Technology, Bhopal, India

Aug 2023 – May 2027

B.Tech in Information Technology

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, System Design, Database Management Systems, Operating Systems, Computer Networks

PROFESSIONAL SUMMARY

Backend-focused full-stack engineer — Java, Spring Boot, Kafka, React. I've architected 9-service microservice systems, cut latency 20% with event-driven design, and shipped to 10,000+ users. IIIT Bhopal '27. Building things that scale, not just things that work..

PROFESSIONAL EXPERIENCE

Full-Stack Development Intern | KT20, Canada (Remote)

Apr 2026 – Jul 2026

- Developed and optimized scalable **Java Spring Boot + React** applications for **10,000+ active users**, building secure REST APIs and improving performance through efficient API design and database optimization.
- Collaborated in an **Agile** environment using **Git** and code reviews, debugging production issues and delivering reliable features with faster release cycles.

SKILLS

Programming	Java, JavaScript (ES6+), TypeScript, Python, C++
Backend	Spring Boot, Spring MVC, Spring Cloud, Spring Security, RESTful APIs, JPA/Hibernate, JWT, RBAC, Microservices, API Gateway, Eureka, Feign Client
System Design	HLD, LLD, CAP Theorem, Load Balancing, Rate Limiting, Database Sharding, Horizontal Scaling, Caching Strategies, Event-Driven Architecture, SOLID Principles
Databases	PostgreSQL, MySQL, MongoDB, Redis, Query Optimization, Indexing, Transaction Management, Connection Pooling, ORM
DevOps & Cloud	Docker, Docker Compose, GitHub Actions, CI/CD Pipelines, AWS EC2, AWS S3, Linux, Shell Scripting, Vercel
Messaging	Apache Kafka, Asynchronous Processing, Event-Driven Workflows, Message Queues, Producer-Consumer Pattern
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, REST API Integration
Tools	Gemini API, Razorpay SDK, Swagger/OpenAPI, Postman, Maven, Git, Data Structures & Algorithms

PROJECTS

NexaMed – AI Healthcare & Learning Platform — Spring Boot, Spring Cloud, Kafka, Redis, PostgreSQL, Docker, OpenAI API [GitHub](#)

- Architected 9 independently deployable microservices (Auth, API Gateway, Course, Notification, AI Service) using Domain-Driven Design; Spring Cloud Config + Eureka for service discovery and fault-tolerant resilience.
- Slashed notification latency by 20%** by replacing synchronous REST calls with Apache Kafka event-driven messaging; processes 1,000+ concurrent events without blocking primary request threads.
- Eliminated 90% of unauthorized access** via JWT + RBAC; accelerated read endpoints by 40% with cache-aside TTL strategy; integrated OpenAI API shrinking quiz creation from 10 min to 2 sec.

E-Bazaar – Scalable E-Commerce Platform — Spring Boot, PostgreSQL, Redis, Docker, Razorpay, Gemini API, React.js [GitHub](#) | [Live](#)

- Engineered multi-tenant RBAC backend (Admin, Seller, Customer) applying Strategy and Factory design patterns; enforced strict cross-tenant data isolation across 100% of API endpoints.
- Boosted API response time by 40%** combining distributed cache + composite DB indexes; sub-3-second Razorpay checkout; React.js on Vercel + Spring Boot on Render with GitHub Actions CI/CD pipeline.

NexBank – Digital Banking Platform — Spring Boot, React, PostgreSQL, Kafka, Docker, JWT [GitHub](#) | [Live](#)

- Architected a **modular monolithic banking platform** with Account, Transaction, Payment, Beneficiary, Notification, Fraud, Admin, and Audit modules, using clean domain boundaries and ACID-compliant transactional workflows.
- Secured financial operations** with JWT + RBAC, idempotent fund transfers, optimistic locking, and audit logging; designed concurrent transaction handling to prevent duplicate payments and inconsistent account balances.
- Improved system reliability and scalability** using Kafka for asynchronous notifications, audit, fraud, and analytics events; containerized the application with Docker and exposed REST APIs through Swagger/OpenAPI.

ACHIEVEMENTS

- Flipkart Grid 7.0:** Cleared the DSA-based online assessment round and advanced to the next stage of the competition as part of a college team.
- Smart India Hackathon 2024:** Selected to represent IIIT Bhopal; contributed to backend development in a 6-member team, building REST APIs and database schema for a national government problem statement.
