## PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience designing scalable REST APIs, secure multi-tenant architectures, and production-grade applications using Spring Boot. Strong in database optimization, caching, authentication systems, and scalable system design.

## PROJECT EXPERIENCE

**Hiredly – Multi-Tenant AI-Powered Job Portal**| *React, Spring Boot, MySQL, Gemini API* | GITHUB

- Engineered a secure multi-tenant architecture with RBAC authorization ensuring strict data isolation across user roles.
- Integrated Gemini API for AI assessments and interview feedback.
- Optimized DB queries (reduced latency by 35%); added pagination & filtering.
- Implemented async email processing and centralized exception handling.
- Containerized services using Docker for consistent deployment across environments.

**BuyBaazar – Scalable E-Commerce System**| *React, Spring Boot, PostgreSQL, Docker*| GITHUB | Live

- Designed scalable RBAC-enabled multi-tenant architecture for Admins & Sellers.
- Secured APIs with Spring Security + JWT (reduced unauthorized access by 90%).
- Improved API performance using Redis caching and PostgreSQL query optimization, achieving 40% faster response times.
- Integrated Razorpay with retry & transaction management (checkout time under 3 seconds).
- Added centralized logging, AI recommendations (Gemini API), and AWS EC2 deployment with Nginx.

## Technical Skills

- **Languages**: Java, C++, C, JavaScript (ES6+), TypeScript, Python.
- **Backend Development:** Spring Boot, Spring Security, REST APIs, JPA/Hibernate, JWT, RBAC, Multithreading, Concurrency, Exception Handling, Logging (SLF4J), API Validation, Pagination.
- **Databases & Caching**: MySQL (Indexing, Query Optimization), PostgreSQL, MongoDB, Redis (Caching Basics), Transaction Management.
- **DevOps & Cloud:** Docker, Git, GitHub Actions (CI/CD), AWS (EC2, S3), Linux Basics, Nginx (Reverse Proxy), Environment-based Configurations.
- **Tools & Integrations**: Postman, Swagger/OpenAPI, Maven, Razorpay, Google Maps API, Gemini API
- **Concepts**: Data Structures & Algorithms, OOP, OS Fundamentals, DBMS, Computer Networks, RESTful Architecture, SDLC, Scalable System Design.

## Achievements

- **Semi-Finalist – Flipkart Grid 7.0 (2024):** Advanced to national semi-finals among 250,000+ participants by building scalable tech solutions under timed constraints.
- **500+ Algorithmic Challenges Solved:** Completed advanced DSA problems across **LeetCode** and **CodeChef**, improving coding efficiency and algorithmic proficiency.
- **Smart India Hackathon 2024:** Collaborated in a 6-member team to design and deploy a **real-world software solution** for a government-backed problem statement.

## Education

IIIT Bhopal | B.Tech IT | CGPA: 7.5 | 2023–2027
RIRS, Fatehabad (CBSE) | XII: 89.2% (2022) | X: 92.8% (2020)
