PROFESSIONAL SUMMARY

Results-driven Java Backend Developer with demonstrated leadership in architecting and delivering production-grade microservices, event-driven systems, and AI-integrated platforms. Increased system performance by up to 40% through caching, query optimization, and async processing. Experienced in leading end-to-end design decisions, mentoring peers, and shipping scalable solutions under competitive constraints.

TECHNICAL SKILLS

Languages: Java, C++, JavaScript (ES6+), TypeScript, Python
Backend: Spring Boot, Spring Cloud, Spring Security, REST APIs, JPA/Hibernate, JWT, RBAC, Feign Client, Microservices, API Gateway, Eureka
Databases & Caching: MySQL, PostgreSQL, MongoDB, Redis, Query Optimization, Indexing, Transaction Management
Messaging & Events: Apache Kafka (Producer/Consumer, Event-Driven Architecture)
DevOps & Cloud: Docker, Docker Compose, GitHub Actions CI/CD, AWS EC2/S3, Nginx, Linux
AI & Integrations: OpenAI API, Gemini API, Razorpay, Swagger/OpenAPI, Postman, Maven
Concepts: DSA, OOP, System Design, DBMS, Computer Networks, OS Fundamentals, SDLC

PROJECT EXPERIENCE

NexaMed – AI Healthcare & Learning Platform (Microservices) | *Spring Boot, Spring Cloud, Kafka, Redis, PostgreSQL, Docker, OpenAI API, Github*

- Led architecture and development of 9+ independently deployable microservices (Eureka, API Gateway, Auth, User, Course, Notification, AI Service), enabling domain-level independent scaling.
- **Reduced unauthorized access by 90%:** Implemented JWT + RBAC security across all services with Feign Client-based inter-service communication.
- **Cut notification latency by 60%:** Designed event-driven async workflows using Apache Kafka, replacing blocking synchronous calls.
- Decreased quiz creation time to under 2 seconds: Integrated OpenAI API for AI-powered quiz generation and automated evaluation.
- Improved read API performance by 40% via Redis caching; containerized full stack with Docker Compose for one-command deployment.

BuyBaazar – Scalable Multi-Tenant E-Commerce Platform | *Spring Boot, PostgreSQL, Redis, React, Docker, AWS EC2, Razorpay, Gemini API Live*

- Architected RBAC multi-tenant system supporting 3 distinct user roles (Admin, Seller, Customer) with strict data isolation across domains.
- **Achieved 40% faster API response times:** Combined Redis caching with PostgreSQL index optimization under simulated production load.
- **Delivered checkout under 3 seconds:** Integrated Razorpay with retry logic and distributed transaction management for payment reliability.
- Deployed on AWS EC2 with Nginx reverse proxy and GitHub Actions CI/CD; added Gemini API-powered AI product recommendations.

Hiredly – Multi-Tenant AI-Powered Job Portal | *Spring Boot, MySQL, Gemini API, Docker, React Github*

- **Reduced manual screening effort by ~50%:** Integrated Gemini API for AI-driven interview assessments and real-time candidate feedback.
- **Lowered DB query latency by 35%:** Applied MySQL indexing, pagination, and query rewriting on high-traffic endpoints.
- Implemented async email processing and centralized exception handling, improving system reliability and reducing error response time by 45%.

ACHIEVEMENTS & LEADERSHIP

- **Flipkart Grid 7.0 Semi-Finalist (2024):** Advanced to national semi-finals among 250,000+ participants; led technical solution design and presentation under timed constraints.
- **Smart India Hackathon 2024 (National Level):** Directed backend architecture in a 6-member team; delivered a government-backed software solution within 36 hours.

EDUCATION

B.Tech – Information Technology | IIIT Bhopal | CGPA: 7.36 | 2023 – 2027
Class XII (CBSE): 89.2% (2022) | Class X (CBSE): 92.8% (2020) — RIRS, Fatehabad
